

Amerisoft-Water Mobile Water Softener

About the Mobile Water Softener

The Amerisoft-Water Mobile Water Softener goes where you go, providing home soft water luxury while away from home. Simply, attach the softener to the water inlet hose to enjoy immediate soft water. But with the Mobile Softener, there's no need for bulky brine tanks, and the small softener is comparable in size to a bottle of wine. Plus, Amerisoft-Water Mobile Softeners do not have electric motors, drain lines, and are easy enough that just about anyone can install one in about the time it takes to hook up a garden hose.

How the Amerisoft-Water Mobile Softener works

The Mobile Water Softener uses a patented high capacity Ion Exchange Resin, which means more soft water without sacrificing water pressure. The water softener comes in three sizes, is reusable and is designed to provide years of soft water.

Where are Amerisoft-Water Mobile Softener used

Amerisoft-Water Mobile Water Softeners are considered required equipment by many Boat and RV owners for on demand soft water. You are also likely to find a water softener in a motorcycle saddle back headed to Sturgis, attached to a portable pressure washer, mobile food stand, portable window washer, mobile carpet cleaning service or to clean the golf cart.

Benefits of the Amerisoft-Water Mobile Water Softener

Finally, RV and Marine owners can experience the same benefits of soft water they have at home, on the road or on the water. That's because the mobile softener is easy to use, inexpensive (just \$99 to \$289) and easy to install. Other benefits:

- Hot Water Heaters, Ice Makers, Water Pumps and Wash Down Systems will last up to 30 percent longer and operate more efficiently.
- Soft Water helps the Water Filter and Reverse Osmosis Membranes (many of which are disposable) last longer and work better.
- Better tasting water, whether it's drinking water from the tap, or water used to brew your favorite coffee. (We think it leads to reduce coffee runs to high-priced java joints, too.) You will see and feel the difference of Soft Water with clear ice and faster exterior cleaning.
- Because the softener conditions the water, you'll get fewer-if any- water spots. Clothes last longer when washed in soft water. Shampoo lathers and cleans better.
- Reduced soap scum and residue, means less time cleaning and more time playing.

Installation and maintenance

Amerisoft-Water Softeners are assembled and ready to use. Installation is similar to adding a spray nozzle or sprinkler to your garden hose.

There is minimal maintenance to release the hard water deposits, which is easily remedied by simply reinstalling the hose cap and pouring in a mixture of iodized table salt and water. After an hour, flush with water, the softener is recharged and ready for reuse.

About Amerisoft-Water

Amerisoft-Water is located in Bloomington Illinois. Products are marketed nationally by independent distributors, available through retailers and online.
